FmPro Migrator
Platinum Edition
The Access to FileMaker® Pro migration tool

Convert Access Tables, Forms/Reports, Relationships, Queries & Visual Basic Code to FileMaker Pro

Top Features

• Up-size Microsoft Access databases to FileMaker Pro for enhanced capacity, scalability, ease of use & cross-platform compatibility.

• Convert legacy apps for use on mobile devices having local data storage with FileMaker Go [i.e. meter reading, inspections, quoting apps], sync data when network access is available.

• Automate conversion of Forms/Reports/SubForms into FileMaker Pro Layouts/Portals.

• The Code Conversion Workbench uses machine learning models to convert Visual Basic code into FileMaker scripts [Included with the AI Accelerated feature set].

• Convert grouped radio buttons/checkboxes into fields on Layouts with Custom Value Lists.

• Transfer Access database relationships into FileMaker Pro relationships.

• De-dupe and convert Access Value Lists into FileMaker Pro Custom Value Lists.

• Migrate embedded Form/Report images, rectangles, lines & tab panels into Layout objects.
